Project Description

Calvin. Giordano and Associates will revise the current shoreline and compress the aerial images created by Southern Resource Mapping.

Exhibit "2"

Scope of Services and Project Schedule

Objective:

The objective for Calvin, Giordano and Associates is to replace the current GIS shoreline feature with the new shoreline data giving the City of Marathon a more accurate representation of where the shoreline actually is. Compress the aerial images to a more manageable file size.

Specifications:

1. The original shoreline was created from high altitude-low resolution aerial photos designed for 300 scale. The new shoreline data was created from low altitude-high resolution aerials designed for 50 scale, giving a more accurate depiction of the shoreline. To be completed 30 days after receiving notification of commencement.
2. The aerial images are made up of 18 tiles and each tile ranges from 550 Megs to just over 650 Megs. CGA will have the aerial photos compressed from 18 tiles (TIF) at over 11 Gigs using a compression ratio of 20:1 or 25:1. This will make the data more manageable and will open the door to all users interested in viewing the aerials. To be completed 14 days after receiving notification of commencement.
