CITY OF MARATHON, FLORIDA RESOLUTION 2018-23

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MARATHON, FLORIDA, APPROVING CHANGE ORDER #4 FOR "MARATHON AREA 3 WWTP UPGRADES AND MARATHON AREA 4 WWTP FILTER UPGRADES," WHICH WAS APPROVED BY RESOLUTION 2016-106 ON NOVEMBER 15, 2016; AUTHORIZING THE CITY MANAGER TO EXECUTE THE CONTRACT AND EXPEND BUDGETED FUNDS ON BEHALF OF THE CITY; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City of Marathon (the "City") approved a contract by Resolution 2016-106 for "Marathon Area 3 WWTP Plant Upgrades and Marathon Area 4 WWTP Filter Upgrades," on November 15, 2016 (the "Project"); and

WHEREAS, Staff and our Engineer have requested addition work for the emergency repairs to the Service Area 5 WWTP in an amount not to exceed \$3,099,185.89 for change order #4 to the project; and

WHEREAS, the City Council finds that approving the change order for the Project with the Contractor is in the best interest of the City.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF MARATHON, FLORIDA, THAT:

- **Section 1.** The above recitals are true and correct and incorporated herein.
- **Section 2.** Change Order #4 between the City and Contractor for the Project in an amount not to exceed \$3,099,185.89, a copy of which is attached hereto as Exhibit "A, is hereby approved. The City Manager is authorized to execute the Contract and expend budgeted funds on behalf of the City.
 - **Section 3**. This resolution shall take effect immediately upon its adoption.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF MARATHON, FLORIDA, THIS 13th DAY OF MARCH, 2018.

EXHIBIT "C" CHANGE ORDER

CHANGE ORDER NO. <u>04</u>

TO: City of Marathon

PROJECT: Marathon Area 3&4 WWTP Upgrades

CONTRACTOR: Reynold's Construction

DATE: March 13th, 2018

This Change Order will authorize the following change to the Agreement:

The Work as set forth in the Agreement is hereby amended to include the items set forth on **Exhibit "1"** attached hereto and by this reference made a part hereof.

This Change Order constitutes full, final, and complete compensation to the Contractor for all costs, expenses, overhead, and profit, and any damages, and/or time adjustments of every kind that the Contractor may incur in connection with the above referenced changes in the Work, and any other effect on any of the Work under the Agreement. The Contractor acknowledges and agrees that (a) the Contract Price of \$3,099,185.89 under the Agreement will be changed by this Change Order, and (b) the schedule for performance of Work will be changed by this Change Order. Contractor expressly waives any claims for any additional compensation, damages or time extensions in connection with the above-referenced changes. Except as herein or heretofore expressly modified, all terms of the Agreement shall remain in full force and effect and shall cover the performance of, and payment for, any work authorized hereunder. Any defined terms not defined in this Change Order shall have the meanings set forth in the Agreement.

By signing below the parties indicate acceptance of this Change Order as set forth herein.

CONSENT OF SURETY TO CHANGE ORDER

The Surety Agrees that this change order is not a cardinal change and if the Change Order includes an increase in the Contract amount, then the penal amount of the payment and performance bond issued for this Contract is increased by the dollar amount of this Change Order.

WARNING: THIS POWER OF ATTORNEY IS INVALID WITHOUT THE RED BORDER

This Power of Attorney is granted under and by the authority of the following resolutions adopted by the Boards of Directors of Farmington Casualty Company, Fidelity and Guaranty Insurance Company, Fidelity and Guaranty Insurance Company, St. Paul Fire and Marine Insurance Company, St. Paul Guardian Insurance Company, St. Paul Mercury Insurance Company, Travelers Casualty and Surety Company of America, and United States Fidelity and Guaranty Company, which resolutions are now in full force and effect, reading as follows:

RESOLVED, that the Chairman, the President, any Vice Chairman, any Executive Vice President, any Senior Vice President, any Vice President, any Second Vice President, the Treasurer, any Assistant Treasurer, the Corporate Secretary or any Assistant Secretary may appoint Attorneys-in-Fact and Agents to act for and on behalf of the Company and may give such appointee such authority as his or her certificate of authority may prescribe to sign with the Company's name and seal with the Company's seal bonds, recognizances, contracts of indemnity, and other writings obligatory in the nature of a bond, recognizance, or conditional undertaking, and any of said officers or the Board of Directors at any time may remove any such appointee and revoke the power given him or her; and it is

FURTHER RESOLVED, that the Chairman, the President, any Vice Chairman, any Executive Vice President, any Senior Vice President or any Vice President may delegate all or any part of the foregoing authority to one or more officers or employees of this Company, provided that each such delegation is in writing and a copy thereof is filed in the office of the Secretary; and it is

FURTHER RESOLVED, that any bond, recognizance, contract of indemnity, or writing obligatory in the nature of a bond, recognizance, or conditional undertaking shall be valid and binding upon the Company when (a) signed by the President, any Vice Chairman, any Executive Vice President, any Senior Vice President or any Vice President, any Second Vice President, the Treasurer, any Assistant Treasurer, the Corporate Secretary or any Assistant Secretary and duly attested and sealed with the Company's seal by a Secretary or Assistant Secretary; or (b) duly executed (under seal, if required) by one or more Attorneys-in-Fact and Agents pursuant to the power prescribed in his or her certificate or their certificates of authority or by one or more Company officers pursuant to a written delegation of authority; and it is

FURTHER RESOLVED, that the signature of each of the following officers: President, any Executive Vice President, any Senior Vice President, any Vice President, any Assistant Vice President, any Secretary, and Assistant Secretary, and the seal of the Company may be affixed by facsimile to any Power of Attorney or to any certificate relating thereto appointing Resident Vice Presidents, Resident Assistant Secretaries or Attorneys-in-Fact for purposes only of executing and attesting bonds and undertakings and other writings obligatory in the nature thereof, and any such Power of Attorney or certificate bearing such facsimile signature or facsimile seal shall be valid and binding upon the Company and any such power so executed and certified by such facsimile signature and facsimile seal shall be valid and binding on the Company in the future with respect to any bond or understanding to which it is attached.

I, Kevin E. Hughes, the undersigned, Assistant Secretary, of Farmington Casualty Company, Fidelity and Guaranty Insurance Company, Fidelity and Guaranty Insurance Company, Fidelity and Guaranty Insurance Company, St. Paul Fire and Marine Insurance Company, St. Paul Guardian Insurance Company, St. Paul Mercury Insurance Company, Travelers Casualty and Surety Company, Travelers Casualty and Surety Company of America, and United States Fidelity and Guaranty Company do hereby certify that the above and foregoing is a true and correct copy of the Power of Attorney executed by said Companies, which is in full force and effect and has not been revoked.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed the seals of said Companies this __13th__ day of _____MARCH______, 2018_

| 5 WWTP | as v | vell | as | a valv | e issue | at | Area | 4. | Each | change | order | item | is | briefly | addressed |
| below. | | | | | | | | | | | | | | | |

PCO #14 -Area 4 Post EQ Check Valve Replacement. This work was performed by Reynold's to replace 2 failed check valves located in the Area 4 WWTP post EQ tank. Due to the difficult location of the work and the City's continued focus on hurricane repair work, it was decided to have Reynold's address the issue as it affected their ability to finish startup of the new Disc Filter.

PCO #15- Area 5 MBR Replacement & Pipe Work. This work was performed by Reynold's under a work directive issued by the City. The work was required to be done prior and in conjunction to the MBR upgrade being performed by OVIVO. The work was similar to work being done under Reynold's contract and was conducted on an emergency basis because the MBRs capacity was greatly affected by Hurricane Irma.

Area 5 Emergency Tank Repairs & WWTP Improvements. This work is proposed work in order to prevent imminent failure of the Treatment Tanks as well as the MBR tanks. Further details of these issues can be found in the attached memo by Ed Castle Dated 2/1/2018. Other work items to improve the plant's operation and life span are included in this proposal.

The cost breakdown is as follows:

| WORK ITEM DESCRIPTION | PRICE |
|---|-----------------------|
| PCO #14 Area 5 MBR Replacement & Pipe Work PCO #15 Area 4 Post EQ Check Valve Replacement | \$146,818.12 |
| PCO #15 Area 4 Post EQ Check Valve Replacement | \$1407.45 |

These items are controlled by the U.S. Government and authorized for export only to the country of ultimate destination for use by the ultimate consignee or end-user(s) herein identified. They may not be resold, transferred, or otherwise disposed of, to any other country or to any person other than the authorized ultimate consignee or end-user(s), either in their original form or after being incorporated into other items, without first obtaining approval from the U.S. Government or as otherwise authorized by U.S. law and regulations.

All claims for damages in transit or shortage must be filed with the carrier. Terms and conditions of sale are presented on the reverse side hereof. Any and all additional or different terms shall not become part of the contract between Themes and you. Your acceptance of the goods will be considered an acceptance and assent to the terms on the reverse side hereof.

IMPORTANT MESSAGE

Beginning August 1, 2017, ModSpace will assess late charges when an invoice remains unpaid after sixty (60) days. You can avoid late charges by paying all open invoices before July 31, 2017 and by promptly paying all future invoices.

Access your account, retrieve invoice copies and make a payment 24/7 at ModSpace.com/en/Accounts.

Area 5 Emergency Tank Repairs & WWTP Improvements

(THE REST OF THE PAGE WAS INTENTIONALLY LEFT BLANK)

March 2, 2018

Mr. Steve Suggs Weiler Engineering

RE:

Marathon WWTP Area 3&4 Upgrades

Marathon, FL

Subject:

Proposed Change Order #18 – Area 5 WWTP Upgrades

Mr. Suggs,

In response to the City of Marathon's request for proposal to proceed with work on the Area 5 upgrades, Reynolds has provided pricing as discussed. Enclosed you will find a written construction plan and scope, the construction estimate and a proposed schedule. The schedule is tentative based on finalizing design and contracts.

If there is any additional information required for this item, please let us know and Reynolds will promptly respond.

Sincerely,

Reynolds Construction

Kevin Conkey Project Manager

cc:

Josh Vondersaar

Kevin Shemwell Devin Baker

Enclosed:

Construction Plan and Scope

Construction Estimate

Tentative Construction Schedule

City of Marathon, FL - Area 5 WWTP Improvements

Approach and Schedule:

Reynolds understands the importance of a properly functioning wastewater treatment facility and the problems that can arise when a plant is not operating at its full potential. We also realize that, over time, certain components can wear quicker than others therefore necessitating the replacement or revitalization of those components or systems. It is our pleasure to work in conjunction with Weiler Engineering to provide this proposal for the desired improvements to the existing Area 5 WWTP to The City of Marathon. We hope you will find it to cover all the necessary aspects of the desired improvements while meeting the City's budget and time constraints.

The work areas that have been identified are:

- Aquastore Treatment Basin: Coating and cathodic protection upgrades to the (2) existing Aquastore Treatment Basins including inner and outer tanks.
- **Influent EQ Tank:** Concrete repairs, application of high-performance interior coatings, and grating replacement at the Influent EQ Tank.
- **Existing Flow Splitter Boxes:** Replacement of the (2) Existing flow splitter boxes with 316 SS splitter boxes.
- **Existing MBR Tanks:** Cathodic protection and high-performance coating upgrades to the (3) existing MBR Tanks along with new access walkways.
- **Chlorine Contact Tank:** Inspect, repair, and recoat the (2) existing Chlorine Contact Tanks located above the digester with high-performance corrosion resistant coating system.
- New Headworks: Construction of a new elevated Headworks platform with improved screening capabilities.
- Miscellaneous Work: Recoating of all exposed exterior yard piping (excluding stainless steel and electrical conduit), modifications to existing digester yard pipe connections, demolition of existing coarse screen, fine screen and associated piping, installation of 3 new vacuum system valves and sample taps.

The following is a more defined description of the proposed work in each area.

Aquastore Aeration Basin 1 and 2

The existing aeration basins are approximately 33'-7" in diameter with a sidewall height of approximately 19'-3". The original tank was constructed and placed into service around 2002. Around 2010, an inner section was added. This inner tank measures approximately 19'-7" in diameter and extends a similar height as the outer tank. Both tanks, Tank 1 and Tank 2, are identical in size. These tanks were constructed of glass fused to steel panels and are holted together.

Over time, these tanks have experienced a variety of issues detrimental to their ability to withstand the environment as well as the tank contents. There are signs of both coating damage or failure as well as, what appears to be, galvanic corrosion.

The preliminary drawings prepared by Weiler Engineering details the proposed procedure and steps to both repair the existing damage and to re-coat the tank exteriors in an effort to extend the service life of these tanks. The proposed work on each tank involves working with the plant operator to isolate one tank at a time to remove it from service and perform the following:

- Isolate and drain tank.
- Power wash all interior surfaces of the tank (inside of outer tank wall, both sides of the inner tank wall). All water/debris will be processed through the normal tank drains through the

City of Marathon, FL – Area 5 WWTP Improvements

plant process. We have not included any special procedures to treat, pump or process the water/debris created from this operation. We have presumed the water (potable or non-potable) will be supplied by the City at no cost to the contractor.

- Remove the existing diffuser assemblies and store on site for re-installation. Removal is necessary for ease of access within the tanks and to prevent any potential damage to the diffuser assemblies. This would be an ideal opportunity to inspect the existing air headers, laterals and diffusers and determine if any damage or deterioration needs to be addressed. We have not included any costs in our proposal for any inspection, replacement parts, or maintenance by Reynolds or by the original equipment manufacturer.
- Remove existing WAS pumps and pipe.
- Remove all tank exterior plastic nut caps and sealant for replacement.
- We have not included any metal repair. We have only included coating repairs.
- Replace any rusted or deteriorated tank seam bolts. We have included replacing 500 existing galvanized steel bolts with 316 SS bolts and nuts.
- Mask off all interior tank seams and remove the existing glass fused to steel lining.
- Prep and pinbraze bonding jumpers to improve conductivity between tank plates.
- Installation of new tank seam coating system as recommended by Weiler Engineering (Coating system manufacturer – Belzona)
- Surface prep, as recommended by the coating manufacturer, application of tank exterior coatings as determined by Weiler Engineering. Coating system manufacturer is Tnemec.
- Holiday test interior and exterior coating systems.
- Installation of new plastic protective caps with sealant over all exterior tank nuts.
- Installation of new anodes, 316SS brackets, and wiring.
- Re-install the existing air diffuser assemblies.
- Return tank to service.

We anticipate the above work to take approximately 11 weeks to complete. Once Tank 1 work is complete and back in operation, we will work with the plant operators to begin draining Tank 2 to perform the same activities as described above. Shutoff of any WWTP process including but not limited to valves, equipment, etc. shall be done with prior consent of the plant Operator during hours in which the operator is on site.

EQ Tank

The existing Influent EQ tank is a cast-in-place concrete structure below the MBR and Surge Tanks. There is an existing set of aluminum stairs that extend from the top of the post Anoxic Tank up to the MBR/EQ Tank. The existing treads have some damage and it is desired for these treads to be replaced. They will be replaced in-kind.

The existing aluminum grating over the top of the Post Anoxic Tank shows signs of damage along with an inadequate number of hold down devices. The existing grating is not trim banded on the ends of the load bearing bars and is allowing undesired flex and curl in the grating. It is desired to remove and replace the existing grating in-kind.

The condition of the interior EQ Tank concrete surfaces is not known. It is desired that Reynolds drain the tank, inspect the existing concrete conditions with the Engineer, make any necessary and recommended repairs, and coat the inside of this concrete tank. Without knowing the amount or extent of the damages, we have included an allowance of \$10,000 to address the concrete repairs that may be discovered. The work includes the following:

CONSTRUCTION PLAN AND SCOPE City of Marathon, FL – Area 5 WWTP Improvements

- Remove existing submersible pumps and guide rails and set aside for re-installation.
- Pressure wash interior of tank. All water/debris with exception of large particles such as rocks or loose concrete will be removed using a submersible pump and will be discharged into the plant process stream where the City sees fit. Reynolds has not included any special procedures to treat, pump or process the water/debris created from this operation except for possibly utilizing a settling tank if gravel and .or concrete debris is encountered. Reynolds has presumed the water (potable or non-potable) will be supplied by the City at no cost to the contractor. Any large debris that cannot be removed via the submersible pump shall be removed through other means and disposed of properly.
- Inspect and identify any necessary areas requiring concrete repairs.
- Perform any necessary concrete repairs.
- Surface prep and installation of concrete coating system as specified by Weiler Engineering.
- Re-install pump guide rails and submersible pumps.
- Install new aluminum grating.
- Replace existing aluminum stair treads.

We anticipate the work associated with this structure to take approximately 8 weeks to complete.

Existing Flow Splitter Boxes

The existing flow splitter boxes are constructed of carbon steel and are showing signs of coating failure and they have started to rust. In an effort to prevent this from becoming a continual maintenance item it is desired to replace the existing splitter boxes with new boxes constructed entirely of 316 stainless steel. The new units will be identical is all other facets of size and design as the existing units with the one exception of making an additional provision for a 3" connection to the existing Digester on the RAS splitter box.

To minimize disruption of plant flow/process, all ancillary work will be completed to the fullest extent possible prior to the arrival of the new splitter boxes. Once each new splitter box is onsite and ready for install, we expect each splitter box replacement to be completed in one day each. This work may need to be performed in off hours. Reynolds will coordinate any shut downs with City staff to ensure a smooth installation that will not significantly impact the plant process.

Existing MBR Tanks

It is desired to take a pro-active approach to the longevity of the steel MBR tanks. The exterior of these tanks are showing some signs of corrosion development. In order to identify the extent of any corrosion potential each membrane tank will need to be removed from service, the membrane cassette remove from the tank. The tanks can then be inspected, any necessary repairs made and prep the inside of the tanks for a new coating system as specified by Weiler Engineering. At this time, the exterior of the tanks will also be addressed.

- Isolate MBR Tank 1 and drain.
- Remove MBR cassette and store per manufacturers requirements.
- Inspect and make necessary repairs to tank interior.
- Pinbraze bonding jumpers to interior and exterior of tank (8 total per tank).
- Prep and coat tank interior with Tnemec product specified by Weiler Engineering.
- Extend influent pipe as specified by Weiler Engineering.
- Re-Install MBR cassette per manufacturers recommendations.
- Install new anodes, brackets, and wiring.

CONSTRUCTION PLAN AND SCOPE City of Marathon, FL – Area 5 WWTP Improvements

- Return to service with check from MBR manufacturer to ensure proper installation and operation.
- Complete above steps for Tank 2.
- Complete above steps for Tank 3.

The work associated with these repairs and upgrades is expected to take approximately 4 weeks per tank.

Additional work that will take place around the MBR tanks is the following:

- Removal of existing abandoned steel and ductile iron piping that is no longer in service and cap pipes as necessary.
- Prep and coat tank exterior with Tnemec product specified by Weiler Engineering.
- Fabrication and installation of a proposed 3 feet wide aluminum framed walkway along the south and west sides of the existing concrete tank. This will allow easier access around all sides of the MBR Tanks. Separation material will be provided between walkway and concrete tank as specified.
- These three activities will not require any additional outages and can be performed with no changes in current plant process or flow arrangements.

New Headworks

The new Headworks structure will be located between the existing digester and the vacuum pump facility. It will consist of a structural steel frame with aluminum grating and aluminum handrail at the top surface. This is where the new static screen(s) will be located. The structural steel will shop blasted and shop primed and will be field coated with a Tnemec coating system specified by Weiler Engineering. During construction we will also install additions to the existing concrete dewatering pad. The work includes the following:

- Install auger cast pile foundations to support the structural steel frame. We have based our proposal on installing (6) piles at a depth of 30'-0 each.
- Install underground piping.
 - o 3" Headworks drain pipe from new dewatering slab to tie into existing drain.
 - o 2" Potable water from the Operations Building to the Booster Pumps.
 - o 8" Influent sewer piping to the new Headworks.
- Install cast-in-place pile caps.
- Install cast in place foundation slab.
- Erect and field weld structural steel frame.
- Install grating and handrail.
- Install Headworks equipment.
- Install exposed piping.
 - All piping connections on or near Headworks including a new flow meter on the influent piping.
 - o 8" Effluent piping from Headworks to tie-in near existing Coarse Screen.
 - o 10" Effluent piping that will bypass the EQ Tank.
 - o Install new flow meter meter downstream of bypass and EQ tank tie-in to splitter box.
 - All associated plug valves on influent and effluent piping of the static screens.
 - 1" Hydroxide piping from existing to new Headworks.
 - 3" Odor Control piping from the Headworks to the existing scrubber. This will also include a new in-line air fan. Piping shall be schedule 40 PVC.
 - 3" RAS piping from the splitter box to the Digester.

City of Marathon, FL – Area 5 WWTP Improvements

- Apply field coatings/painting.
- Make final piping tie-ins.
- Install cast-in-place additions to existing dewatering pad to extend to the existing asphalt paved drive.
- All piping will be Schedule 80 PVC unless otherwise noted.

We estimate the total duration to perform this work to be approximately 15 weeks.

Existing Chlorine Contact Chamber

The existing chlorine contact chamber will also be recoated as a part of this work. One half of the CCC will be taken out of service and drained. During this time, the tank will be inspected for any necessary repairs as well as the necessity for any full depth coating repair. All coatings will be based on Weiler Engineering's specified Thermec series 104. Sika Flex shall be applied around the exterior of the CCCs.

We anticipate this work to take approximately 3-4 weeks per half, 7-8 weeks total.

Proposed Project Schedule Milestone Dates

| • | Change Order Issued | 5 | March 14, 2018 |
|---|------------------------|-----|------------------|
| • | Change Order Execution | | March 19, 2018 |
| ٠ | Begin Construction | ii. | March 26, 2018 |
| • | Substantial Completion | - | October 29, 2018 |
| • | Final Completion | = | November 9, 2018 |
| | | | |

Clarifications -

- Due to the uncertainty of the extend of deterioration to the existing concrete in the EQ Tank, we have included an allowance amount of \$10,000 for any concrete repairs that may be necessary before the application of the specified coating system.
- It has been assumed that Reynolds will have full access to the property west of the plant within the airport fence for staging of the crane at a minimum.
- The existing storage containers on the east side of the Operations Building will be removed from the site prior to our mobilization. Due to the small foot print of the site, this area will need to be utilized for our staging and storage.
- The project has been scheduled and priced based upon the following presumptions:
 - o One MBR and One Treatment Tank can both be off line at the same time.
 - One CCC can be taken off line at any time and is independent of any other work being performed.
 - o The EQ Tank cannot be drained until the new Headworks is complete and operational.
- Finalized drawings for the Headworks structure will need to be provided no later than March 16th to prevent any delays in detailing and fabrication.
- A \$100,000.00 Time and Material (T&M) allocation has been included in the contract price. This allocation will be used on a T&M basis with prior authorization by the City before work under this allocation commences. Any unused balance left at the end of the project shall be deducted from the contract price.

City of Marathon, FL - Area 5 WWTP Improvements

- At the time of bid, pricing was not available for the static screens. Reynolds has included \$160,000
 of cost for purchasing the screens. Any change in pricing from that amount will be charged or
 credited towards the T&M contingency.
- The completion dates are based on received an executed change order on date shown above. If these dates can't be made or the headworks design is delayed, completion of the project could be delayed as well.
