### CITY OF MARATHON, FLORIDA RESOLUTION 2025-09

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MARATHON, FLORIDA, AWARDING THE CONTRACT FOR THE AREA 3 COATINGS UPGRADE TO REYNOLDS CONSTRCUTION, LLC IN AN AMOUNT NOT TO EXCCED \$293,287.00; AUTHORIZING THE CITY MANAGER TO EXECUTE THE CONTRACT AND EXPENDING BUDGETED FUNDS ON BEHALF OF THE CITY; AND PROVIDING FOR AN EFFECTIVE DATE

**WHEREAS**, the city requires an upgrade to the coatings on the chlorine contact tank, the headworks, and the filter platform at the Area 3 treatment plant, and

**WHEREAS**, Reynolds Construction, LLC has a continuing services agreement with the city, and,

WHEREAS, staff recommends this contract for approval.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF MARATHON, FLORIDA, THAT:

- **Section 1**. The above recitals are true and correct and incorporated herein.
- Section 2. The City Council hereby authorizes the City Manager to enter into an agreement and expend budgeted funds on behalf of the City to Reynolds Construction, LLC in the amount not to exceed \$293,287.00.
  - **Section 3**. This resolution shall take effect immediately upon its adoption.

PASSED AND APPROVED BY THE CITY COUNCIL OF THE CITY OF MARATHON, FLORIDA, THIS 11<sup>th</sup> DAY OF FEBRUARY 2025.

THE CITY OF MARATHON, FLORIDA

Mayor Lynn Landry

APPROVED AS TO FORM AND LEGAL SUFFICIENCY FOR THE USE AND RELIANCE OF THE CITY OF MARATHON, FLORIDA ONLY:

Steve Williams, City Attorney

City of Marathon Mr. Dan Saus Marathon, FL 33050

January 17, 2025

RE:

City of Marathon

Corrosion and Coatings Remediation

Service Area 3

Mr. Saus:

Reynolds Construction (RC) appreciates the opportunity to assemble a proposal to remediate and restore heavily corroded areas on the chlorine contact chamber, headworks platform and the disk filter platform.

Based on jobsite reviews with the City of Marathon, and input from TNEMEC, Reynolds proposes to complete the scope of work as further outlined individually, or as a complete package as discounted.

- Chlorine Contact Chamber (CCC) TNEMEC 120-5002 (2 coats, not 1), 120-5001 (2 coats, not 1)
  - o \$209,277.42
- Headworks Platform TNEMEC 135/1094 (pending level of corrosion and prep, may be 2 coats of 135)
  - 0 \$67,841.68
- Filter Platform TNEMEC 135/1094 (pending level of corrosion and prep, may be 2 coats of 135)
  - o \$20,547.08
  - Total of three (3) locations if the package is determined to be completed in whole (3 areas).
    - \$293,287.00 (two hundred ninety-three thousand two hundred eighty-seven and zero)

Scope of work includes, but is not limited to:

- Complete blasting per SP10 on the interior with a complete recoating of the CCC interior. The exterior mechanical cleaning and then re-coat in whole.
- Combination of mechanical cleaning and spot blasting for preparation and a complete recoating of the
  entire headworks platform in addition to grating removal and re-anchoring with alternative clamping
  mechanisms to reduce future corrosion.
- Spot blasting and paint touch-ups on heavily corroded areas of the disk filter platform.

The Reynolds Florida Keys team is appreciative of the opportunity to provide this quotation and is looking forward to the prospect to work with the City of Marathon staff.

Respectfully Provided: Reynolds Construction, LLC

Joshua R. Vondersaar

### CHEMBUILD® SERIES 135

#### PRODUCT PROFILE

**GENERIC DESCRIPTION** Modified Polyamidoamine Epoxy

High-build coating with superior wetting for marginally prepared rusty steel and tightly adhering old coatings. Excellent **COMMON USAGE** 

abrasion-, chemical- and corrosion-resistance. Perfect foundation for aliphatic-polyurethanes. NOT FOR IMMERSION

SERVICE

DC7+ Off-White, 12+3 Metallic Aluminum and more: refer to Themec Color Guide, COLORS

Note: Epoxies chalk with extended exposure to sunlight, Lack of ventilation, incomplete mixing, miscatalyzation or the

use of heaters that emit carbon dioxide and carbon monoxide during application and initial stages of curing may cause

yellowing to occur-FINISH Semi-gloss

PERFORMANCE CRITERIA Extensive test data available. Contact your Themec representative for specific test results.

#### COATING SYSTEM

**PRIMERS** Steel: Self-priming

Galvanized Steel and Non-Ferrous Metal: Self-priming

**TOPCOATS** 

Series 6, 30, 35, 66, L69, L69F, N69, N69F, V69, V69F, 73, 84, 104, 115, 161, 1028, 1029, 1070, 1071, 1072, 1074, 1074U, 1075, 1075U, **Note:** When topcoating with Endura-Shield polyurchane finish, exterior exposed Series 135 has the following maximum time to recoat: Series 73, 1074, 1074U or 1075/1075U, 60 days. Series 1070, 1071 or 1072, 14 days. If these times are exceeded, an epoxy intermediate coat or scarification is required before topcoating. Refer to appropriate

topcoat data sheet for additional information.

#### SURFACE PREPARATION

Abrasive blast cleaning to SSPC-SP6/NACE 3 generally produces the best coating performance, If conditions will not permit this, Series 135 may be applied to SSPC-SP2 or SP3 Hand or Power Tool Cleaned surfaces. STEEL

**GALVANIZED STEEL & NON-**

**FERROUS METAL** 

Surface preparation recommendations will vary depending on substrate and exposure conditions, Contact your Tnemec

representative or Tnemec Technical Services.

**PAINTED SURFACES** Test patch is recommended.

**ALL SURFACES** Must be clean, dry and free of oil, grease and other contaminants.

#### TECHNICAL DATA

**VOLUME SOLIDS** 

 $8 \pm 0 \pm 2.0\%$  (mixed) †

RECOMMENDED DFT

Conventional Build: 4.0 to 6.0 mils (100 to 150 microns) per coat.

Hi-Build: 7.0 to 9.0 mils (180 to 230 microns) per coat

Note: Number of coats and thickness requirements will vary with substrate, application method and exposure, Contact

your Tnemec representative.

**CURING TIME** 

Temperature	To Touch	To Handle	To Recoat
75°F (24°C)	6 hours at 5,0 mils DFT (125 microns)	18 hours	24 hours

Curing time varies with surface temperature, air movement, humidity and film thickness,

**VOLATILE ORGANIC COMPOUNDS** EPA Method 24 Unthinned: 0.72 lbs/gallon (86 grams/litre)

Thinned 15% (No. 19 Thinner): 1.91 lbs/gallon (229 grams/litre) Thinned 15% (No. 18 Thinner): 2.05 lbs/gallon (246 grams/litre) Thinned 15% (No. 62 Thinner): 0.72 lbs/gallon (86 grams/litre) †

**Unthinned:** 1.29 lbs/gal solids **Thinned 15% (No. 19 Thinner):** 2.54 lbs/gal solids **Thinned 15% (No. 18 Thinner):** 1.29 lbs/gal solids

THEORETICAL COVERAGE

1.347 mil sq ft/gal (33.1 m²/L at 25 microns). See APPLICATION for coverage rates,  $\dot{\tau}$ 

**NUMBER OF COMPONENTS** Two: Part A and Part B

**MIXING RATIO** 

By volume: Four (Part A) to one (Part B)

**PACKAGING** 

Five-Gallon Kit: Consists of four gallons of Part A in a five-gallon pail and one gallon of Part B in a one-gallon can. When

mixed, yields five gallons (18.9L)

One-Gallon Kit: Consists of a partially filled one-gallon can of Part A and a partially filled one-quart can of Part B. When mixed, yields one gallon (3.79L).

**NET WEIGHT PER GALLON** 

Series 135:  $12.30 \pm 0.25$  lbs  $(5.58 \pm .11 \text{ kg})$  (mixed) 135-1243:  $11.52 \pm 0.25$  lbs  $(5.23 \pm .11 \text{ kg})$  (mixed) †

STORAGE TEMPERATURE TEMPERATURE RESISTANCE

Minimum 20°F (-7°C) Maximum 120°F (+9°C) (Dry) Continuous 250°F (121°C) Intermittent 275°F (135°C)

SHELF LIFE

24 months at recommended storage temperature.

FLASH POINT - SETA

Part A: 75°F (25°C) Part B: 201°F (94°C)

**HEALTH & SAFETY** 

Paint products contain chemical ingredients which are considered hazardous. Read container label warning and Material

Safety Data Sheet for important health and safety information prior to the use of this product.

Keep out of the reach of children.

## CHEMBUILD® | SERIES 135

#### APPLICATION

#### **COVERAGE RATES**

Conventional Build (Spray, Brush or Roller)

	Dry Mils (Microns)	Wet Mils (Microns)	Sq Ft/Gal (m²/Gal)
Suggested	5.0 (125)	6.0 (150)	269 (25_0)
Minimum	4,0 (100)	5.0 (125)	337 (31.3)
Maximum	6.0 (150)	7.0 (180)	224 (20.8)

High-Build (Spray Only)

<u> </u>	Dry Mils (Microns)	Wet Mils (Microns)	Sq Ft/Gal (m²/Gal)
Suggested	8.0 (205)	9.5 (240)	168 (15.6)
Minimum	7.0 (180)	8.5 (215)	192 (17.8)
Maximum	9.0 (230)	11.0 (280)	I50 (13 <sub>.</sub> 9)

Note: Can be spray applied at 7.0 to 9.0 mils (180 to 250 microns) DFT per coat when extra protection or the elimination of a coat is desired. Can be sprayed at 4.0 to 6.0 mils (100 to 150 microns) DFT per coat for use in systems requiring a conventional build. Brush or roller will normally achieve the 4.0 mil (100 microns) minimum for conventional build application. However, under certain conditions some colors may require two coats to achieve suggested film thickness. Allow for overspray and surface irregularities. Film thickness is rounded to the nearest 0.5 mil or 5 microns. Application of coating below minimum or above maximum recommended dry film thicknesses may adversely affect coating performance. 1 performance, †

#### MIXING

Power mix contents of each container, making sure no pigment remains on the bottom. Add the contents of the can marked Part B to Part A while under agitation. Continue agitation until the two components are thoroughly mixed. Do not use mixed material beyond pot life limits. **Note:** Both components must be above 50°F (10°C) prior to mixing. For application to surfaces between 50°F to 60°F (10°C to 16°C), allow mixed material to stand thirty (30) minutes and restir before using. For optimum application properties, blended components should be above 60°F (16°C).

#### THINNING

For air or airless spray, thin 10% to 15% or 3/4 pint to 1 1/4 pints (380 to 570 mL) per gallon with No. 19 or No. 62 Thinner, For brush or roller, thin 10% to 15% or 3/4 pint to 1 1/4 pints (380 to 570 mL) per gallon with No. 18 or No. 62

#### **POT LIFE**

8 hours at 50°F (10°C) + hours at 77°F (25°C) 2 hours at 100°F (38°C)

#### APPLICATION EQUIPMENT

Gun	Fluid Tip	Air Cap	Air Hose ID	Mat'l Hose ID	Atomizing Pressure	Pot Pressure
DeVilbiss JGA	E "00"0	765 or 704	5/16° or 3/8° (7.9 or 9.5 mm)	3/8" or 1/2" (9.5 or 12.7 mm)	70-90 pst (+ 8-6 2 bar)	20-30 psi (1.4-2.1 bar)

Low temperatures or longer hoses require higher pot pressure,

#### Airless Spray

Air Spray

Tip Orifice	Atomizing Pressure	Mat'l Hose ID	Manifold Filter
0.017 -0.021	3000-4200 psi	1/4" or 3/8"	60 mesh
(430-535 microns)	(207-290 bar)	(6.4 or 9.5 nm)	(250 microns)

Use appropriate tip/atomizing pressure for equipment, applicator technique and weather conditions.

Note: Series 135-1243 must be applied by brush or roller to achieve aluminum appearance. For spray application, contact

your Themec representative. **Roller:** Use 3.8" or 1/2" (9.5 mm or 12.7 mm) synthetic woven nap covers.

Brush: Use high quality natural or synthetic bristle brushes

#### **SURFACE TEMPERATURE**

Minimum 50°F (10°C) Maximum 135°F (57°C)

The surface should be dry and at least 5°F (3°C) above the dew point. **Note:** Amine blush may develop during cure if the surface temperature drops below the minimum, particularly under high humidity. Blush must be removed prior to topcoating; contact your Themee representative.

#### CLEANUP

Flush and clean all equipment immediately after use with the recommended thinner or MEK.

† Values may vary with color.

WARBANTY & HAITATION OF SELERN HABILITY. Themes Company, Inc. wantaris only that its contings represented berein meet the formulation standards of Themes Company. Inc. Technical and application information berein is provided for the purpose of establishing a general profile of the coating and proper coating application, environmental and easign factors can vary significantly, due care should be exercised in the selection and use of the coating.

### ENDURA-SHIELD® SERIES 1094

PRODUCT DATA SHEET

#### PRODUCT PROFILE

GENERIC DESCRIPTION

Aliphatic Acrylic Polyurethane

**COMMON USAGE** 

A user friendly, low VOC, aliphatic polyurethane coating that provides excellent color and gloss retention for exterior applications to steel, concrete and other substrates in commercial, industrial, and marine environments. Direct-to-Metal capability allows for a labor-saving, high-build, single coat application

COLORS

Refer to Themee Color Guide. Note: Certain colors may require multiple coats depending on method of application and finish coat color. When feasible, the preceding coat should be in the same color family, but noticeably different.

**FINISH** 

SPECIAL QUALIFICATIONS

Series 1094 meets the requirements of LEED-Low-Emitting Materials, Collaborative for High-Performance Schools-Paints & Coatings, WELL Building Standard-VOC Restrictions, and Living Building Challenge-Healthy Interior Performance, Contact your Themee representative for more information.

Series 1091 meets the accelerated weathering requirements of SSPC-Paint 36 (level 3A) Paint Standard.

#### COATING SYSTEM

Minimum	3.0 (75)	5.0 (130)	321 (29.8)
Maximum	6.0 (150)	10 (255)	160 (1+9)

**Note:** Coverage rates based on unthinned material. Allow for overspray and surface irregularities. Film thickness is rounded to the nearest 0.5 mil or 5 microns. Application of coating below minimum or above maximum recommended dry film thicknesses may adversely affect coating performance, †

#### MIXING

Sfir contents of the container marked Part A, making sure no pigment remains on the bottom. If using Series 44-456 accelerator, slowly add two (2) ounces of Series 44-456 per mixed gallon of Series 1094 while under agitation. Note: The use of more than the recommended amount of Series ++456 accelerator will adversely affect performance

Add the contents of the container marked Part B to Part A while under mechanical agitation, Continue agitation until the two components are thoroughly mixed. Do not use mixed material beyond pot life limits. Caution: Part B is moisturesensitive and will react with atmospheric moisture. Keep unused material tightly closed at all times. Do not reseal mixed material. An explosion hazard may be created.

#### THINNING

Thinning is required for proper application. Use No. 10 Thinner. For air spray, airless spray, brush or roller, thin up to 10% or 12 ounces (354 mL) per gallon. **Note:** In areas that require lower VOC, use No. 46 Thinner.

#### **POT LIFE**

Without 44-456: 4 hours at 75°F (24°C)

With 44-456: 5 hours at 35°F (2°C) 1 hours at 55°F (13°C) 3 hours at 75°F (2 f°C)

#### APPLICATION EQUIPMENT

#### Air Spray

Gun	Fluid Tip	Air Cap	Air Hose ID	Mat'l Hose ID	Atomizing Pressure	Pot Pressure

1 gallon (3,79L) kits, 3 gallon (11,4L) kits are available upon special request,

**NET WEIGHT PER GALLON** 

 $10.80 \pm 0.25$  lbs (4.90 ± .11 kg) (mixed)

STORAGE TEMPERATURE

Minimum 35°F (2°C) Maximum 90°F (32°C)

TEMPERATURE RESISTANCE

(Dry) Continuous 300°F (149°C) Intermittent 450°F (232°C)

SHELF LIFE

Part A: 3 months at 35°F to 49°F (2°C to 9°C), 2 months at 50°F to 79°F (10°C to 26°C). I month at 80°F to 90°F (27°C to

32°C). Do not store at temperature below 35°F (2°C) or above 90°F (32°C).

DUE TO THE REACTIVE NATURE OF THE VINYL ESTER RESINS AND THE CORRESPONDING LIMITED SHELF LIFE, EXPEDITIOUS USE OF THIS PRODUCT IS SUGGESTED, SINCE JOBSITE STORAGE CONDITIONS ARE BEYOND TNEMEC'S CONTROL, THIS PRODUCT IS NON-RETURNABLE.

Part B: 12 months at recommended storage temperature.

FLASH POINT - SETA

Part A: 90°F (32°C) Part B: 190°F (88°C)

**HEALTH & SAFETY** 

Paint products contain chemical ingredients which are considered hazardous. Read container label warning and Material

Safety Data Sheet for important health and safety information prior to the use of this product.

Keep out of the reach of children.

## VINESTER® | 120-5002

#### APPLICATION

#### **COVERAGE RATES**

(Practical)

Dry Mils (Microns)	Wet Mils (Microns)	Sq Ft/Gal (m²/Gal)		
12.0-18.0 (305-155)	20.0-25.0 (510-635)	60-80 (5.6-7.1)		

Practical spreading rates are based on typical field applications. Actual spreading rates will vary with surface profile, amount of overspray and surface irregularities. Application of coating below minimum or above maximum recommended dry film thicknesses may adversely affect coating performance. THIS PRODUCT SHOULD NOT BE APPLIED BELOW 60°F (16°C) MATERIAL TEMPERATURE

#### MIXING

Power mix contents of Part A (base) thoroughly, making sure no pigment remains on the bottom of the can. Add the Part B (catalyst) slowly to the Part A while under agitation. Continue to agitate until thoroughly mixed. Care should be exercised so as not to entrap air in the mixed material. Do not use mixed material beyond pot life limits.

#### THINNING

Use No. 19 Thinner, For air or airless spray, thin up to 3% per gallon.

**POT LIFE** 

3 to 5 hours at 65°F (18°C) -1.1'2 to 2 1/2 hours at 75°F (24°C)  $\dot{\tau}$  † At higher temperatures pot life will decrease (use caution in spray equipment). In hot weather, material should be cooled to 65°F to 80°F (18°C to 27°C) prior to mixing and application to improve workability and avoid shortened pot

#### APPLICATION EQUIPMENT

Gun	Fluid Tip	Air Cap	Air Hose ID	Mat'l Hose ID	Atomizing Pressure	Pot Pressure
DeVilbiss JGA	E	78	5/16 or 3/8 (7.9 or 9.5 mm)	3/8" or 1, 2" (9.5 or 12" mm)	60-80 psi (±1-5.5 bar)	10-20 psi (0 7-1 + bar)

Low temperatures or longer hoses require higher pot pressure.

#### Airless Spray

Ĺ	Tip Orifice	Atomizing Pressure	Mat'l Hose ID	Manifold Filter
	0.015"-0.021"	2400-3000 psi	1/4" or 3/8"	60 mesh
	(380-535 microns)	(165-20° bar)	(6.4 or 9.5 mm)	(250 microns)

Use appropriate tip/atomizing pressure for equipment, applicator technique and weather conditions. **Brush:** Recommended for small areas only. Use high quality natural or synthetic bristle brushes. **Note:** Two or more coats may be required to obtain recommended film thicknesses.

#### SURFACE TEMPERATURE

Minimum 60°F (16°C) Maximum 110°F (+3°C)

Minimum 60°F (16°C) Maximum 110°F (45°C). The surface should be dry and at least 5°F (3°C) above the dew point. At surface temperatures below 60°F (16°C), Series 120 will not cure properly or obtain maximum chemical resistance. Following application, the surface temperature must be held at or above 60°F (16°C) until the coating surface is tack free approximately 8 hours at 60°F (16°C) surface temperature. 6 hours at 70°F (21°C) surface temperature. 4 hours at 80°F (2°°C) surface temperature to avoid incomplete polymerization. At relative humidities above 75% the cure of this coating may be retarded. It is also recommended that all reconstructs by relating to present that relative to the relative to the relative humidities above 75%. precautions be taken to insure that adequate forced-air ventilation exists

#### CLEANUP

Flush and clean all equipment immediately after use with the recommended thinner or MEK. If material begins to exotherm, flush equipment immediately

WARRANTY & LIMITATION OF SELLERS LIABILITY Themes Company, Inc. Warrants only that its coatings represented herein meet the formulation standards of Themes Company, Inc. EXPRESSED OR IMPLIED INCLIDING BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MER LIANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THERE ARE NO WARRANTIES THAT EXTEND BEYOND THE DESCRIPTION ON THE FACE TERROR. The burget's sole and exclosive remedy against Taemes Company, Inc. shall be for replacement of the product in the event a dedective condition of the product should be found to exist and the exclusive remedy shall not have failed by essential purpose as long as Timene; is willing to provide a onputation replacement product of the product should be found to exist and the exclusive remedy shall not have failed by essential purpose as long as Timene; is willing to provide a onputation and the product should be found to exist and the exclusive remedy shall not have failed by essential purpose as long as Timene; is willing to provide a particular product of the purpose of establishing a general profile of the contingent of the contingent proper estating application proceedings. Test performance results were obtained in a controlled environment and Toenes Company makes no claim that these tests or any other tests, accurately represent all environments. As application, environmental and design factors can vary significantly, due care should be exercised in the selection and use of the contingent

### VINESTER® 120-5001

PRODUCT DATA SHEET

ODU		

**GENERIC DESCRIPTION** 

Novolac Vinyl Ester

COMMON USAGE

A finish coat designed for superior protection against organic and inorganic acids and sour crude when stored at elevated temperatures in insulated tanks. Sprayable lining for tanks and vessels. Provides splash, spillage and fume protection for structural surfaces and secondary containment, **Note**: Contact your Themee representative or Themee Technical Services

with specific chemical exposures

Series 23TSC, 239SC, 252SC, 270

COLORS

5001 Gray, Color change will occur when Series 120 is exposed to sunlight: also, batch-to-batch color variations can be

expected.

FINISH Semi-gloss

PERFORMANCE CRITERIA

Extensive test data available. Contact your Themee representative for specific test results.

#### **COATING SYSTEM**

SURFACER/FILLER/PATCHER

Series 215, 218. Note: Prime coat of 120-5002 is required over surfacer/filler/patcher prior to application of 120-5001.

**PRIMERS** 

Prepared Bare Concrete and Steel: Series 120-5002

INTERMEDIATE

#### SURFACE PREPARATION

**ALL SURFACES** 

Must be clean, dry and free of oil, grease, and other contaminants. See primer product data sheet for surface preparation recommendations

#### TECHNICAL DATA

**VOLUME SOLIDS** 

Theoretical 89% (mixed). Series 120 Vinester system contains a reactive monomer and some loss will occur during application and cure. Actual solids by volume will vary depending upon temperature and air movement. See Practical Coverage Rates.

RECOMMENDED DFT

12.0 to 18.0 mils (305 to 455 microns) per coat (minimum of one coat 5002 primer and one coat 5001 finish coat).

**CURING TIME** 

Temperature	To Handle	To Recoat	Immersion
75°F (24°C)	4 hours	6 hours min 72 hours max	72 hours min

Note: Scarification required if maximum recoat time is exceeded.

Curing time varies with surface temperature, air movement, humidity and film thickness.

**VOLATILE ORGANIC COMPOUNDS** 

Unthinned: 0 6+ lbs/gallon (קס grams/litre) Thinned 3%: 0.83 lbs gallon (99 grams/litre)

NUMBER OF COMPONENTS PACKAGING

Two: Part A (base) and Part B (catalyst)

1 gallon (3.79L) kits, 3 gallon (11.4L) kits are available upon special request.

**NET WEIGHT PER GALLON** 

 $10.98 \pm 0.25$  lbs (4.98 ± .11 kg) (mixed)

STORAGE TEMPERATURE

Minimum 35°F (2°C) Maximum 90°F (32°C)

TEMPERATURE RESISTANCE

(Dry) Continuous 300°F (149°C) Intermittent 450°F (232°C)

SHELF LIFE

Part A: 3 months at 35°F to 49°F (2°C to 9°C). 2 months at 50°F to 79°F (10°C to 26°C), 1 month at 80°F to 90°F (27°C to 32°C). Do not store at temperature below 35°F (2°C) or above 90°F (32°C). DUE TO THE REACTIVE NATURE OF THE VINYL ESTER RESINS AND THE CORRESPONDING LIMITED SHELF LIFE, EXPEDITIOUS USE OF THIS PRODUCT IS SUGGESTED, SINCE JOBSITE STORAGE CONDITIONS ARE BEYOND TNEMEC'S CONTROL. THIS PRODUCT IS NON-RETURNABLE.

Part B: 12 months at recommended storage temperature

FLASH POINT - SETA

Part A: 90°F (32°C) Part B: 190°F (88°C)

**HEALTH & SAFETY** 

Paint products contain chemical ingredients which are considered hazardous. Read container label warning and Material

Safety Data Sheet for important health and safety information prior to the use of this product. Keep out of the reach of children.

## VINESTER® | 120-5001

#### APPLICATION

#### **COVERAGE RATES**

(Peactical)

Dry Mils (Microns)	Wet Mils (Microns)	Sq Ft/Gal (m²/Gal)
12.0-18.0 (305-155)	20.0-25.0 (510-635)	60-80 (5.6-7.1)
