9805 Overseas Hwy, Marathon, FL 33050

Area 7 Design, Permitting and Construction Administration

1. PSA approved via Resolution 2024-35. This project includes design of the effluent force main
2. Modeling of the force main has been completed
3. FDEP Permitting drawings are under final review. The FDEP application package is under final review prior to signing and sealing.
4. The FDOT permitting set is under in final design, under review at this time.
5. The Construction bid package is near completion, with the ITB and technical specifications completed and under review.
6. Design of the effluent pumping station is in the preliminary design phase. Pump selection has been made.

Deep Injection Well Design, Permitting and Construction Administration

1. Weiler Engineering prepared a Request for Qualifications for design, permitting and construction administration for the deep injection well and the deep injection well pumping station.
2. The Request for Qualifications was published by the City. Water Science Associates was selected to perform this task. Award was authorized under Resolution 2024-129 on 12/10/24.
3. The scope of work for WSA includes design and permitting of the deep injection well and the required monitoring wells and design & permitting of the DIW pumping station. WSA will provide the required professional to observe and log the deep well borings and soils classifications during construction.
